THE UNIVERSITY OF WASHINGTON
Arboretum bulletin

A JOURNAL OF GENERAL HORTICULTURAL INFORMATION
PUBLISHED QUARTERLY BY THE UNIVERSITY OF WASHINGTON
ARBORETUM FOUNDATION • SEATTLE, WASHINGTON 98105

VOLUME XXVIII, NUMBER 4

Winter, 1965

INTRODUCTION

Since March 1942 the ARBORETUM BULLETIN has been published quarterly by the University of Washington Arboretum Foundation in a format similar to that now in use. Each year an index for the year has been included in the Winter issue; however, this year the current index was included in the Fall issue.

A cumulative twelve-year index was included in the Summer issue of 1955 [Vol. XVIII, No. 2], which covered the period from March 1942 through Winter 1954. [Vol. V, No. 3 through Vol. XVII, No. 4]. In view of the usefulness of this index, the Editorial Board decided to devote the current Winter issue to an index covering the ten-year period from Spring 1955 through Winter 1964 [Vol. XVIII through XXVII].

The index is divided into two principal sections, authors and subjects, both arranged alphabetically. As in the previous index, illustrations are indicated by a dagger (†), illustrated articles or notes on a specific plant or subject by a double dagger (‡), and book reviows by an asterick (*). The Spring, Summer and Fall 1960 issues were devoted to excerpts reprinted from former Bulletins: these are indicated by (§). Principal subject headings are in bold face type. Many entries have been cross-referenced to facilitate ease of finding.

The bulk of the work in compiling the index has been done by Miss Gene Webb, Executive Secretary of the Arboretum Foundation. She was ably assisted by Mrs. Hugh Baird, Mrs. Robert Berry and Mrs. Leonard Wilcox, members of the Editorial Board.

Copies of many of the back issues of the bulletin are still available from the Arboretum Foundation office at fifty cents per copy. Additional copies of this and the previous index may also be purchased at the same price.

Gordon D. Marckworth
Editor

WEst 2-0022 — 9616 16th Avenue S.W., Seattle 6

New formula lawn food controls growth

THE OLIVINE-BASE lawn food, GREENSWARD, used extensively by golf courses and parks, is now available at retail stores. GREENSWARD is dust-free and comes in tiny pellets for easy spreading. It will not burn and is non-acid forming.

GREENSWARD

PREVENT ROT
WITH
CUPROLIGNUM

Rot is expensive and inconvenient when it rots your

COLD FRAMES GARDEN STAKES
SEED FLATS TRELLISES
WINDOW HOTHOUSE
BOXES BENCHES

ETC.

Where there is CUPROLIGNUM
there is NO ROT

Sold by Most Lumber Yards and Hardware Dealers
